

TeamViewer Frontline xPick

Vision picking for logistics and warehousing

Zero errors and maximum speed with visual instructions **right in the field of view**

Error-prone, manual logistics processes supported by unwieldy scanners or paper lists still dominate in many businesses.

At the same time, the demands and requirements for reliable logistics processes are increasing.

xPick allows for hands-free, high-speed order picking while simultaneously reducing the number of picking errors drastically. Weight control, barcode scans, localization, operation by voice command, and other components help the picker to achieve best results.

At the same time, user acceptance is outstanding due to the intuitive graphical user interface design.

xPick offers enormous customization flexibility and does not rely on any technology in the environment except Wi-Fi.

xPick allows for hands-free, high-speed order picking while reducing the number of picking errors.

Supporting the entire **logistics value chain**

Core features

Seamless integration

Create custom workflows integrating xPick into your existing WMS or ERP and more with pre-configured interfaces. The integration allows for quick scalability to multiple sites. Sensor integrations such as IoT and RFID guarantee for automatic confirmation.

Powerful management

The Frontline Command Center is the central management hub. Find picking reports, manage users, assign tasks and offer help via remote support. Use the Frontline Creator tool to create and modify your own vision picking processes without cumbersome IT requests.

User-centered experience

xPick runs device and operating system independent on smart glasses, tablets, and other portable devices. This is true for all TeamViewer Frontline solutions. Secure, personalized logins protect your data and adapt workflows to the experience of the workers.

Your benefits

Faster processes

Easy usage allows for up to 40% speed

Higher accuracy

Nearly zero errors through integrated quality control

Greater flexibility

Easy training and fast onboarding of workers

Trusted solution

Industry-proven and in productive global use for years

Instant analysis

Central graphical overview of key performance indicators

Quick payback

ROI within months due to low initial costs and instant performance gains

Discover a new way of working
