Security Feature Series: Conditional Access

Webinar

The speakers

Account Executive Enterprise

Enterprise Solutions Engineer Sales

Silas

Seyfang

Giulia Minnucci

Junior Demand Generation Manager

Agenda

Conditional Access What does it mean?

2 Why What are the benefits?

3 Live demo of Conditional Access Conditional Access in action

4 Q&A Your questions

Conditional Access

What does it mean?

What is Conditional Access

Secure your network – Prevent unauthorized access

- Prevent unauthorized connections
- Full and granular control of all remote connections
- Secure support experiences **at scale**.
- Zero Trust Environment for 100% visibility and control

Why Conditional Access

The only way to 100% prevent unauthorized connections

- **Optime** and **Enforce** access rules at all levels
- Centrally managed incoming & outgoing connections
- Block access from unauthorized sources with dedicated infrastructure
- Restrict features like connection types, file transfers etc. on a granular level

Benefits

Full Control

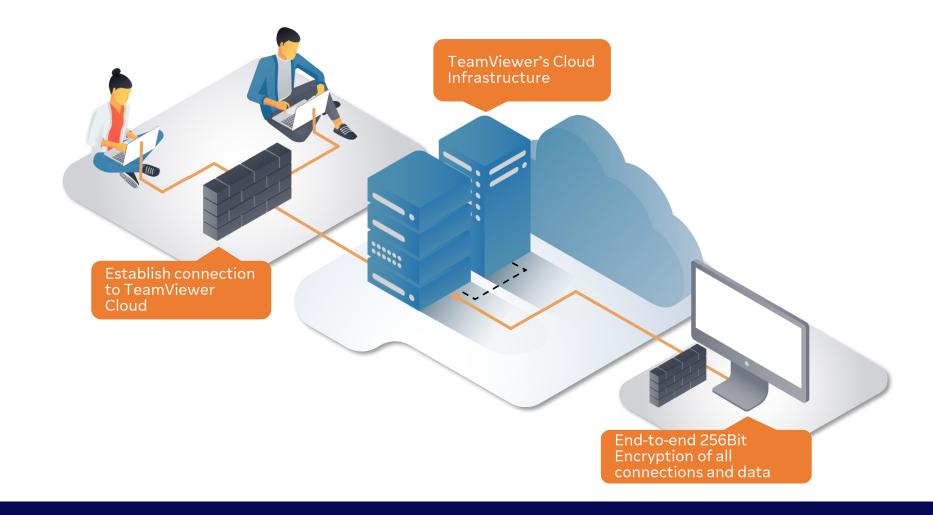

- Set up rules for internal support sessions
- Minimize connectivity options for incoming 3rd party connections with rules
- Deliver secure support experiences to remote and BYOB devices
- Enforce time, expiration and approval based rules for different use cases and requirements
